

To Whom it May Concern;

I live in the Colorado Rockies where radio reception is limited due to the remoteness of the town I live in. I exclusively rely on XM satellite broadcasting for entertainment and media information.

Do not limit or modify my rights to purchase a product that provides the services I need.

HR 4026 would violate my First Admendment right. It would be a conflict of interest if any Government agency in the FCC were to sponsor any such bill lobbied by the NAB agency.

Concerned Citizen,

James G. Russell
